LUMRGI / IGNIFLOW

Industrial burner fuel Buyer's checklist

Start with what you know. Leave the rest blank and discuss it with your supplier, burner technician or adviser before changing fuel.

Site and delivery address: _____

Contact and date: _____

What you can gather yourself

- ☐ What you heat or dry; the fuel you use now
- ☐ Approximate monthly fuel use and usual order size
- ☐ Burner make and model, or a photo of its identification plate
- ☐ Tank size, space for the next load and delivery access
- ☐ Any current problems with starting, filters or steady heat

What to ask the supplier

- ☐ Price including delivery; VAT, payment terms and any extra charges
- ☐ Load size, order notice and what happens if delivery is delayed
- ☐ Technical and safety data sheets for the exact fuel offered
- ☐ Agreed fuel limits, available test results and delivery identification
- ☐ What happens if a delivery does not meet the agreed limits

What to check with your technician or adviser

- ☐ Whether your burner and fuel system can use the proposed fuel
- ☐ Heating, pumping and filter needs, including after a shutdown
- ☐ Fuel properties and test evidence, including a tested flash point
- ☐ Whether hot gases touch your product and affect its quality
- ☐ Applicable emissions, storage and fire rules; any approvals needed

Before any trial

- ☐ Quantity, cost, who oversees it and a safe changeover plan
- ☐ Current fuel use and production records for a fair comparison
- ☐ Required burner/emissions checks and when to stop if problems arise

Questions or missing information: _____

_____

Tell us what you heat, where you are and the fuel you use now.
